

When the Flood Falls by J.E Barnard

3 stars

When a stalker is too good at stalking.

Ex Canadian cop Lacey McCrea's life is in tatters. Nowhere to live and no real job, so when her friend tells her she is being stalked, Lacey investigates. She is not sure if there is a stalker or if her friend is imagining it.

As the melting snow swells the river, Lacey must decide whether there is a stalker or if something else is afoot.

Well, this book is so miserable. I hated the characters as they all had a grievance against the world. It wasn't just the story - their personalities were miserable or mad. The book is not very well thought out and the plot was easily solved which prolonged the agony of the rest of the book.

To be honest, I can see why Lacey's husband left her and why she had no job, as she moaned and groaned and probably pushed everyone away.

A truly bad book in my opinion but read it yourself and decide.

Chester.
